# Varn® Ultra 4100

General purpose fountain concentrate

**Suitable for all UV sheetfed presses**

## Product Features

- Varn® Ultra 4100 is a complete product that prints sharper and will give clean, quick start-ups with a definite reduction in ink consumption. Because less ink and water are run, ink comes off the press drier and denser colours are obtained.
- Varn® Ultra 4100 is specially formulated for use with UV inks, performs well with the latest low energy-high reactivity UV inks and is also suitable for use with conventional inks.

## Advantages of Varn® Ultra 4100

- Improved compatibility with UV metallic inks.
- Stronger desensitising properties.
- Reduced plate staining with metallic golds.
- Milder wetting to give reduced emulsification with UV inks.
- Additional anti-piling agents.
- Fogra approved.
- ISEGA certified.
- Typical IPA levels 5-10%.
- Meets press manufacturers corrosion and elastomer swell requirements.
